PROFESSIONAL SUMMARY

Electronics Engineering Technology professional with extensive hands-on experience in structural drafting, CAD/BIM modeling, and technical design. Proficient in Civil 3D, Revit, and DXF/STEP workflows, producing structural plans, 3D models, and cross-disciplinary schematics for hydropower infrastructure. Drafter experienced in AutoCAD and Revit, currently building Fusion 360 skills through self-study. Hands-on experience with terrain and penstock profiling, 2D-to-3D structural modeling, and CAD automation. Focused on computational design and remote technical support that streamline drafting workflows and deliver precise, well-coordinated documentation.

EDUCATION

BSET Major in Electronics, Technological University of the Philippines - Visayas Talisay City, Philippines | 2021 - 2025

TECHNICAL SKILLS

CAD & Drafting: AutoCAD, Civil 3D, Structural Drafting, 2D Detailing, Technical Documentation, Fusion 360 (learning phase)
BIM & 3D Modeling: Revit, 3D Structural Modeling, 2D-to-3D Conversion, Architectural-Structural Model Integration
Civil & Terrain Design: Surface Modeling, Alignments, Profile Views, Profiling, Point-Based Surfaces
File Interoperability: DXF, STEP, DWG
AI & Automation: CAD Automation, Computational Design, Workflow Automation, Systems Integration
Tools & Platforms: AutoCAD, Revit, Civil 3D, Microsoft Office, Google Workspace, Cloud Storage & File Management
Electronics & Schematics: Electronics Engineering Technology, Cross-Disciplinary Schematics, Technical Design

PROFESSIONAL EXPERIENCE

Draftsman/AutoCAD Operator - Almana Power Corporation
October 2025 - Present

- Drafted and updated 2D structural plans and 3D models for over 10+ hydropower infrastructure modules, maintaining strict engineering specifications.
- Developed custom AutoLISP scripts and CAD macros to automate repetitive drawing extractions and routine updates, accelerating plan modification speed by 70%.
- Standardized dynamic blocks and template libraries, reducing initial layout drafting time by 35% across cross-disciplinary project files.
- Reviewed and audited 100+ Detailed Engineering Design (DED) drawings for technical compliance, cutting revision turnaround times by 50% while achieving 100% adherence to regulatory standards.

Supervised Internship Training 2 (AutoCAD Drafter 3D) - Tsukiden Electronics Philippines Inc.
January 2025 - May 2025

- Assigned to the New Product Introduction (NPI) CAD Engineering team, where I produced 3D models in AutoCAD and fabricated them through 3D printing.
- Designed custom PCB seaters (holding fixtures) used during production and PCB inspection, as well as for other applications required by the team.
- Achieved a 95% fit rate between the printed seaters and the PCBs.

Supervised Internship Training 1 - Datasol Computer & CCTV Solution
July – August 2024

- Repaired and troubleshooted laptops, cellphones, and monitors.
- Provided electronics device consultation and service assistance to clients.
- Helped clients keep their laptops, desktops, and other electronic devices running smoothly through expert repair and maintenance services.

PROJECT

Night-time Alert System for Motorcyclists | Thesis Team Leader & Programmer

- Led a thesis team in developing a motorcycle-mounted pedestrian detection prototype to reduce night-time collisions.
- Programmed an Arduino Mega 2560 to process data from a YDLIDAR X2 sensor and trigger an LED buzzer alert, detecting objects up to 10 meters away within a 30° field in front of the motorcycle.
- Integrated an external night-vision camera with a handlebar display to improve the rider's visibility in low light.
- Custom-fabricated the sensor mounting bracket and field-tested the system on public roads at night.

CERTIFICATION

Autodesk AutoCAD Certified User | Negros Occidental Language & Information Technology Center | 2025
Issued by Certiport, a Pearson VUE business | Authorized by Autodesk

- Validated entry-level AutoCAD skills, including creating and plotting drawings, editing objects, and working with layouts.
- Skills: 2D Design, 3D Design, CAD Drafting, CAD Design, Architecture Design, Engineering Design.
